

ORSKOV 12-73

Am Mon 12/11/

Dear John and family
An unusual combined Christmas, New Year's greeting, article request and sentimental reminiscence card. We would like very much to get a reprint of your article in Journal Research 40:315:1973. The picture is as you have already quoted from our 25th Anniversary in September 1973.
John and I - and hopefully Claus for a short time - expect to go to Washington DC as Fogarty scholars in late spring for 2-3 months. And we are certainly looking forward to get a good long look at US again. After "work" we hope that we shall get a chance to show Claus some of the many things which we enjoyed so much during our stay in Madison many years ago. Claus is 15 now as you know the result of our own private hermaphroditic experiments in the ample, hot and humid July atmosphere in Madison.

Yours John & Claus

Amherst 1973

Dear John and Janice

An unusual combined Christmas, New Years greeting, article request and sentimental reminiscence. We would like very much to get a reprint of your article in Journal Research Vol. 215: 1972. The picture is as you have already received from our 25th Anniversary in December 1973. John and I - and hopefully Claus for a short time - expect to go to Washington DC as Fogarty scholars in late spring for 2-3 months. And we are certainly looking forward to getting a good long look at MS again. After "work" we hope that we shall get a chance to show Claus some of the many things which we enjoyed so much during our stay in Madison many years ago. Claus is 15 now as you know the result of our own private hemispheric experiments in the awful, hot and humid July atmosphere in Madison.

Yours for a Pint
